CNC Manufacturing serving the Aerospace Industry since 1997

MYM MY Machine, Inc. Baldwin Park, California manufacturing facility has received Triumph Aerostructures Hawthorne/Dallas division Approval

Baldwin Park, California July 18, 2013

MY Machine, Inc., Inc. a producer of machined aerospace components, today announced that its Baldwin Park, California manufacturing facility has received approval to perform direct work for Triumph Aerostructure Hawthorne/Dallas divisions.

MY Machine, Inc. services the aerospace, space and defense industries by providing build to print 3 and 5 axis machined components.

This approval allows MY Machine, Inc. to provide quality components for the 747 and 767 programs.

Jamie Young, MY Machine, Inc. Vice President said “As we continue to grow our business in the aerospace, space and defense industries, it is important for us to continually improve in our operations and quality systems. We strive to create and maintain long-term partnerships with our customers, and we believe that achieving this approval is an important milestone for MY Machine, Inc.”

We look forward to providing Triumph Aerostructures with quality 3 and 5 axis machined components which are created from ferrous and non-ferrous materials.

Any inquiries for our services should contact Bob Barker V.P. of Sales for MYM and can be reached at the contact information listed below.
